CPTN 207
Lab Assignment 6

Create a new script to insert data into the database tables created by the previous scripts. The data to be inserted is shown below. The result of this lab should be a script (or scripts) that can be run using the MySQL client.

Customer

101, 'Value Furniture','407 Marshal St.','Boston','MA','99999';
102, 'Home Furnishings','18 Sesame St.','Nashua','NH','03064';
103, 'Heritage Gallery','1 North Ave.','North Pole','NP','12345';
104, 'Period Furniture','99 Oak Road.', 'Santa Fe','NM','34857';

Order

301,101,'2012-01-22 08:32:12';
302,103,'2012-02-15 09:14:32';
303,104,'2011-12-22 11:32:22';

Order Line

301,200,2;
301,202,3;
301,201,1;
302,202,7;
303,202,3;
303,200,6;

Product

200,'Chair','Blue',25.67;
201,'Desk','Maple',102.99;
202,'Bookcase','Walnut',56.43;

Please add a "SELECT * FROM tablename" command for each table to the end of the script.

After the script has been run, check the output from the SELECT statement to determine that all data has been correctly entered into the table.

Once the script has been tested and determined to be correct, please submit the script to Canvas.
